HIGH PERFORMANCE SOUND ABSORPTION SOLUTION FOR WALLS AND CEILINGS

T: +44 (0)1204 380074 E: info@soundreduction.co.uk F: +44 (0)1204 380957 www.soundreduction.co.uk

THE PROBLEM:

Large, open spaces often suffer from poor room acoustics. This manifests itself as reverberation and echo, creating unwelcome levels of noise, seriously affecting speech intelligibility, and making verbal communication difficult. In short, it makes for an unpleasant environment to spend time in, whether for work, leisure, or learning.

THE SOLUTION:

Sonata Aurio panels are an incredibly efficient way to introduce a high performance, absorptive material to any space. The panels comprise a technical, non-shedding, acoustic foam with an acoustically transparent fabric finish to the face and sides. Easily and quickly installed, Sonata Aurio panels can be directly bonded to walls and ceilings and are so robust that they are perfect for gyms, sports halls or anywhere where ball strikes may occur. The product is available in a wide range of colours and sizes to accommodate any existing wall or ceiling and can also be printed with photographs or images to create a striking 'canvas' effect.

VISIT OUR WEBSITE FOR YOUR FREE REPORT & QUOTE:

Using specialist software and some information supplied by you, SRS are able to provide incredibly accurate reports and estimates for your work.

If you would like a quote for your space, please use the link below to access the quick and easy-to-use 'SRS 3 Step Estimator' form at: www.soundreduction.co.uk/3SE - The 3 Step Estimator link also works on mobile devices, so you can upload the pictures and information instantly whilst on site. We will normally get back to you with a proposal and quote within 2 working days.

PRODUCT BENEFITS:

- Building Regulations solution
- Class A rated absorber
- Wide range of colours / sizes
- Bespoke printed panels available
- Extremely robust and durable
- Quick, easy and clean to install
- Bonded solution no drilling required
- Non-shedding foam panels no mineral fibre

HANDLING, CARE AND MAINTENANCE

Sonata Aurio absorbers of standard stock sizes are packed in protective recyclable cartons and placed face-to-face for added protection. The cartons can be stacked up to a suggested maximum of 15No. high or stood upright to a maximum 2 high. Sonata Aurio absorbers are for indoor use only; they should always be kept dry. Due care should be taken when handling the absorbers to avoid soiling the fabric finish.

The absorbers can be cleaned periodically by vacuuming on a low suction setting using a clean vacuum head or suitable interleaf (clean, thin fabric bag over the head). For cleaning of stains please contact us for further guidance.

TESTIMONIALS & EXAMPLES

"Just wanted to say how delighted we are with the Sonata acoustic panels. Not only does it sound so much better, it looks fantastic too. The installation team did a great job. Right from the first time I contacted you about this you have been incredibly helpful. I can't fault the service we received so a big thank you to everyone that was involved."

> Tanya (Centre Manager) THE STYX CENTRE, GUERNSEY

"We are so pleased with our new soundproofing. SRS provided a great service and a quality job - It was very easy to fit and for little disruption such an amazing result! Customers are commenting without being prompted on the improvement and we only regret we did not do it sooner.

Many, many thanks"

Eric (Chef) & Sarah (Front of House) FRENCH TABLE RESTAURANT, SURBITON

"We're so pleased with how fab the ceiling looks! Such a huge difference and the sound reduction has been very effective and noticeable during lessons. The fitters were very professional, punctual and adhered to our requests with particular attention to the health and safety of our pupils and staff alike.

We would definitely recommend your company to other organisations."

Karly Barker (School Business Manager) DURANTS SCHOOL, ENFIELD
